

ORGANIZATION-WIDE COMMERCIAL LICENSE & DEPLOYMENT AGREEMENT

Adobe FrameMaker Technical Documentation Handbook — Enterprise Team Pack & Headless CI/CD Site License

Licensors:	Precision Technical Press (Imprint of Precision Press)	Order Tier:	Enterprise Team Pack (\$495 USD)
Author / Series:	Owen Thackeray · Enterprise Technical Authoring Series	Format / Seats:	5 Paperback Sets + Dept-Wide Digital License
License Type:	Perpetual, Non-Exclusive Commercial Deployment	Jurisdiction:	Commercial / Regulated Documentation (US / Global)

1. Grant of Department-Wide Intranet & Digital Reference License

Precision Technical Press grants the purchasing enterprise, corporation, institution, or agency ("Licensee") a perpetual, non-exclusive, royalty-free, organization-wide commercial license to store, mount, and distribute the digital electronic publication (PDF format) of the *Adobe FrameMaker Technical Documentation Handbook* across internal networks. This license authorizes:

- **Internal Knowledge Base Deployment:** Uploading, indexing, and serving the PDF manual across internal Confluence instances, Microsoft SharePoint portals, document repositories, and self-hosted engineering wikis.
- **Unlimited Concurrent Reading Seats:** Unrestricted reading access for all direct employees, technical writers, information architects, systems engineers, and on-site contractors actively working on Licensee documentation projects.
- **Search & Excerpting Rights:** Right to extract and quote configuration snippets, regex patterns, MIF variable definitions, and command procedures directly into internal style guides and onboarding standard operating procedures (SOPs).

2. Automation, ExtendScript & CI/CD Pipeline Deployment Rights

Licensee is granted unrestricted, worldwide, royalty-free commercial rights to deploy, execute, and integrate all automation scripts, build runners, and configuration files included in the Kestrel automation suite across its engineering build ecosystem:

- **Headless Build Agents:** Commercial execution of `kestrel-build.jsx`, `build-book.cmd`, `build-book.sh`, and associated runners across unlimited on-premise servers, virtual machines, and continuous integration agents (e.g., GitHub Actions, GitLab CI, Azure DevOps, Jenkins, AWS CodeBuild).
- **Internal Customization & Derivative Scripts:** Unrestricted modification, refactoring, and integration of the provided ExtendScript source code and XML application files (`structapps.fm` fragments, `kestrel-rw.txt` read/write rules, DITA catalog mappings) to support proprietary schemas and internal data pipelines.
- **Zero Attribution Obligation in Built Outputs:** Built publications, compiled PDFs, and generated documentation produced by or through the automated build pipeline require zero publisher copyright attribution or public license notice.

3. 5-Seat Physical Paperback Reference Set Allocation

This Enterprise Pack includes five (5) physical copies of the 237-page 8.5" × 11" lay-flat desk reference manual. These copies are allocated for direct shipment to the purchasing organization's primary corporate office or engineering publications facility. Additional replacement or supplementary copies may be purchased under enterprise volume terms upon request.

4. Production Diagnostic Matrix & Troubleshooting Rights

Licensee is licensed full internal deployment rights to the 25-Scenario Diagnostic Troubleshooting Engine, preflight validation scripts, and negative-space inspection tools included with this package. These assets may be adapted and integrated into internal automated preflight checks and team authoring checklists without limitation.

5. Limitations & Governing Terms

Redistribution Restrictions: This license explicitly prohibits public web hosting, commercial re-licensing, sub-licensing, or resale of the handbook PDF, templates, or scripts to third-party entities outside the purchasing corporate entity or government department. All rights not expressly granted herein remain with Precision Technical Press.

Trademark Shielding: Adobe®, FrameMaker®, PostScript®, and Acrobat® are registered trademarks of Adobe. OASIS® and DITA® are registered trademarks of OASIS Open. Precision Technical Press is an independent publisher. This license does not grant trademark or certification claims.
